

Hawthorne Elementary Community Council

Summary of 20-21 LAND Trust plan

Goal #1

Hawthorne Students K-6th will show academic growth on KEEP, end of the level and RISE tests data for 2020-2021. Students will receive Tier I and Tier II instruction during a gaily math block from their teachers using core specific math consumables, online student visual math learning programs, and paraprofessionals to support instruction.

Growth will be measured during the year by formative measurements. Teachers will use this data to inform instruction and guide how paraprofessionals will be used during the math block to support students. This data will be compared to end of level, KEEP and RISE test data for 2021 to measure growth.

To meet this goal of math achievement, Hawthorne will hire highly qualified paraprofessionals to provide interventions. A volunteer coordinator will find and train college education majors to support student learning in math. In addition, math consumables and a visual math program will be purchased for all grades.

Expenditures:

Salaries for paraprofessionals	\$ 24,624
General supplies	<u>17,000</u>
Total	\$ 41,624

Goal #2

Hawthorne students grades 4-6th will achieve academic growth in science based on end of level, RISE test data for 2020-2021.

Student growth in science during the year will be determined by formative measurements. Teachers will use this data to inform instruction that supports student learning. This data will be compared to end of level and RISE test data for 2021 to measure growth.

To meet this goal Hawthorne will purchase grade-level science consumable text, science material to support the new SEEd standards and pay for science trainings attended by staff.

Expenditures:

Teacher PD Admission	\$ 2,000
General Supplies	<u>9,422</u>
Total	\$11,422

Total funding	\$53,046
